

Windcave IP Address Update

PLEASE CASCADE TO TECHNICAL TEAMS AS APPROPRIATE

At Windcave we strive to provide the best possible experience for all our customers. In the coming months there will be some changes to the delivery of our products and endpoints.

These upgrades will ensure that you as our customer and your customers will receive the best possible experience regardless of geographic location. Specifically, response times and the ability for Windcave to defend against DDoS (Distributed Denial of Service) attacks will be further improved.

What you may need to do

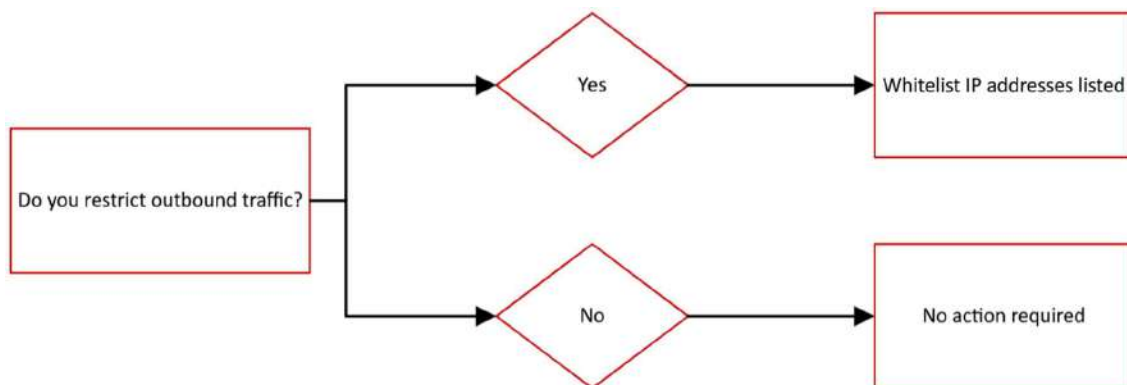

Most customers will not need to make any changes as improvements will be seamlessly integrated into the existing systems, however it is very important you pass on this notice to your technical teams to check over and if needed, changes are made.

Timeline

Changes will start to be rolled out from the following dates.

Production: 15th August 2023

UAT: 28th June 2023

Technical Information

Windcave will be routing its traffic through additional security services to strengthen the protection of its APIs against DDoS and cyber-attacks. This measure is intended to enhance the overall security of Windcave, safeguarding it from potential malicious activities targeted at its APIs.

If you do not restrict outbound traffic, there will be no changes required from your end. However, if you must restrict traffic to a trusted list of IP addresses, please allow the following IP ranges.

IPv4 IP addresses:

203.207.60.0/23, 103.232.204.0/23, 202.167.253.112/28, 45.75.195.0/27, 38.125.44.0/24, 65.223.10.96/27, 173.245.48.0/20, 103.21.244.0/22, 103.22.200.0/22, 103.31.4.0/22, 141.101.64.0/18, 108.162.192.0/18, 190.93.240.0/20, 188.114.96.0/20, 197.234.240.0/22, 198.41.128.0/17, 162.158.0.0/15, 104.16.0.0/13, 104.24.0.0/14, 172.64.0.0/13, 131.0.72.0/22

IPv6 IP addresses:

2400:cb00::/32, 2606:4700::/32, 2803:f800::/32, 2405:b500::/32, 2405:8100::/32, 2a06:98c0::/29, 2c0f:f248::/32

Testing

If you would like to test connectivity prior to the change in production.

Please use our UAT endpoints as detailed: <https://www.windcave.com/connectivity-about>

QUESTIONS?

If you require any further clarification or help on confirming if you are ready for these changes, please contact support@windcave.com
